Catalog Little Champ[®] Hydraulic Power Units

Little Champ® Power Units

3 AND 5 GALLON CAPACITY

General Specifications/Table of Contents

Little Champ® Power Units are designed for use in locations where space is limited and larger, noisier power units are not needed. They're ideal for applications requiring moderate fluid volume and flow rate, short hydraulic lines and quick cycling.

Typical applications include use with:

- Machine Tools
- Packing Machinery
- Food Processing
- Material Handling

Little Champ® Power Units are the perfect choice for applications involving frequent stops and starts, where localized power is needed, or where the noise and vibration of a large power unit would be distracting.
