Chapter 1

Safety Precautions

Always consider safety precautions before beginning a service procedure. Protect yourself and others from injury. Take the following general precautions whenever servicing a hydraulic system.

Warning:

Unintended machine movement

Unintended movement of the machine or mechanism may cause injury to the technician or bystanders. To protect against unintended movement, secure the machine or disable / disconnect the mechanism while servicing.

Warning:

Flammable cleaning solvents

Some cleaning solvents are flammable. To avoid possible fire, do not use cleaning solvents in an area where a source of ignition may be present.

Warning:

Fluid under pressure

Escaping hydraulic fluid under pressure can have sufficient force to penetrate your skin causing serious injury and/or infection. This fluid may also be hot enough to cause burns. Use caution when dealing with hydraulic fluid under pressure. Relieve pressure in the system before removing hoses, fittings, gauges, or components. Never use your hand or any other body part to check for leaks in a pressurized line. Seek medical attention immediately if you are cut by hydraulic fluid.

Warning:

Personal safety

Protect yourself from injury. Use proper safety equipment, including safety glasses, at all times.

-

Special Versions

The list of spare parts cannot be used when ordering parts for special OMP versions.

In this respect, please contact the sales organisation.

Cost-free Repairs

We would point out that cost-free repairs as mentioned in General Conditions of Sale, are carried out only at service shops authorised by the organization.

Dismantling / Cleaning

Topics:

- *Dismantling*
 - *Cleaning*
-

Dismantling

Item	Part to remove	Comments
10	Castellated nut	
11	Washer	
12	Parallel key	
28	Seal plugs	Put the motor in a holding tool, with the output shaft downward. For end port version use 10 mm hexagon socket spanner.
25, 24	Drain plug, washer (if present)	Use a 17 mm spanner socket.
21, 20	Screws, washers	Use a 13 mm spanner socket.
19	End cover	Remove end cover sideways.
18, 16	Gear wheel set O-rings (2 off)	Keep fingers under the gearwheel set to prevent the parts from falling out.
14	Cardan shaft	
Item	Part to remove	Comments
13	Output shaft	<i>Motors with integrated spigot flange:</i> Place the motor housing on the work bench and press the shaft out of the motor housing. Shaft and bearings should normally not be removed from OMPW N. However, if necessary for inspection and cleaning, remove the shaft from the housing by gently tapping the axle journal with a plastic hammer. The front bearing can thus remain in the housing. After this, turn the motor.
1	Screws (6 off)	Use Torx-spanner type T30, 9 mm screwdriver or 4 mm hexagon socket spanner.
4	Spigot flange	
6, 7	O-ring, bearing race	<i>Motors with integrated spigot flange:</i> Remove bearing and bearing race from the motor housing. <i>Motors with separate spigot flange:</i> Use a 2 mm screwdriver
8	Needle bearing	

Item	Part to remove	Comments
5	Shaft seal	<i>Motors with integrated spigot flange:</i>
3	Dust seal	With mandrel and plastic hammer, carefully knock out the shaft seal. <i>Motors with separate spigot flange:</i> Knock out the shaft seal / dust seal with a plastic hammer. Use mandrel SJ 151-9000-7 or SJ 151F9000-7
9	Bearing race	Only OMP/OMPW N with $\varnothing 32$ mm/28.5 mm tapered shaft. Use a 2 mm screwdriver.
26	Check valves (2 off)	<i>Only OMP with check valves.</i> Pull the check valve out with, for example, a ground (shortened) 3.5 mm screw tap.

Cleaning

Cleaning

Clean all parts carefully with low aromatic kerosine.

Inspection and replacement

Check all parts carefully and replace if necessary.

Lubrication

Before assembly, lubricate all parts with hydraulic oil and grease rubber parts with vaseline.

Chapter 9

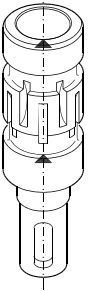

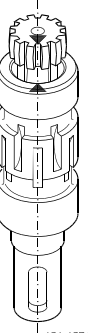

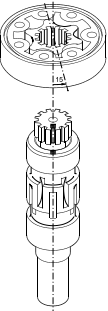

Assembly

Topics:

- [Assembly](#)
-

Assembly

Item	Part to install	Comments
		Place the motor housing in the holding tool with the flange upwards.
26	Check valves (2 off)	<p><i>Only OMP with check valves</i></p> <p>Grease the check valves (fitted with new O-rings) and fit them in their bores with light blows using plastic hammer.</p>
9	Bearing race	Only OMP/OMPW N with $\varnothing 32$ mm / 28.5 mm tapered shaft.
5	Shaft seal	<p><i>Motors with integrated spigot flange:</i></p> <p>Lubricate the shaft seal on the outside with hydraulic oil. Fit the shaft seal correctly onto mandrel SJ 151-0414 and carefully press the shaft seal into position in the motor housing.</p> <p><i>Motors with separate spigot flange:</i></p> <p>Knock the seal into position in the spigot flange. Check that the seal lies against the cover recess. Use mandrel SJ 151-9000-7 or SJ 151F9000-7</p>
3	Dust seal ring	<p>Place the dust seal ring in the spigot flange and knock it into position with a plastic hammer and appropriate mandrel.</p> <p>SJ 151-9000-7 or SJ 151F9000-7</p>
7, 6	Bearing race O-ring	<p><i>Motors with integrated spigot flange:</i></p> <p>Fit bearing and bearing race onto the shaft and mount together with the shaft.</p> <p><i>Motors with separate spigot flange:</i></p> <p>Grease the O-ring with vaseline and fit the bearing race and O-ring into the spigot flange.</p>
8	Needle bearing	
4	Spigot flange	Turn so that the holes line up.
2	Washer	Only OMPW N
1	Screws (6 off)	<p><i>Tightening torque</i></p> <p>Torx screws M6: 5-8 Nm [45-70 lbf•in]</p> <p>Slotted screws M6: 5-8 N•m [45-70 lbf•in]</p> <p>Hexagon socket screws M5: 5-10 N•m [45-70 lbf•in]</p> <p>Hexagon socket screws M5: 12-15 N•m [45-70 lbf•in]</p> <p>After this, turn the motor.</p>

Item	Part to install	Comments
13		<p><i>Grease the journals with hydraulic oil.</i></p> <p>The rear shaft end must be marked before fitted. The mark must be positioned vertically above a commutation slot leading up to the front annular channel.</p> <p>For OMPW N, guide the shaft into the motor housing back with the rear needle bearing fitted on the shaft. Bring the shaft in line with the back of the motor by gently tapping the shaft with a plastic hammer. Check that the shaft rotates easily</p>
<p>Figure 6: Output Shaft</p>		
16	O-ring	Grease the O-ring and put it in the O-ring groove of the housing.
17	Distributor plate	Turn the distributor plate so that the holes line up.
14		<p>Guide the cardan shaft down into the motor housing.</p> <p>Only OMP 25, 32 and 40</p> <p>Place the assembly tool under the upper splines of the cardan shaft.</p> <p>In case of different splines lengths turn the cardan shaft to ensure the long splines end is fitted in the output shaft.</p> <p>Transfer marking from output shaft to cardan shaft.</p>
<p>Figure 7: Cardan shaft</p>		
18, 16		<p>Place the O-rings (greased) in the O-ring grooves of the gearwheel.</p> <p>In gearwheels with non through splines place the gearwheel with the recess in the spline hole facing down towards the housing.</p> <p>Place the gearwheel set on the cardan shaft so that the top of a tooth in the external teeth of the gearwheel is vertically above the mark on the cardan shaft.</p> <p>Turn the gearwheel set counter clockwise until the cardan shaft and the gearwheel start to mesh (15°). Turn the gearwheel rim so that the holes made for the screws line up.</p>
<p>Figure 8: Gearwheel set</p>		
19	End cover	Turn the end cover so that the holes line up.
20, 21	Washer, screws	<p>Use a 13 mm spanner socket</p> <p>Tightening torque: 30 - 35 N•m [265-310 lbf•in].</p>

Item	Part to install	Comments
24, 25	Washer, drain plug	Use a 17 mm spanner socket. Tightening torque: 30 - 60 N•m [270-315 lbf•in].
28	Seal plugs Threaded plug (if present)	End port version: Screw plastic plugs into end ports. Screw in the side port plugs using 10 mm hexagon socket spanner. Tightening torque: 50 - 70 N•m [445-620 lbf•in]. Side port version: Screw in plastic plugs.
12	Parallel key	To be secured with tape or plastic ring
11	Washer	
10	Castellated nut
