

# Rexroth Service for railway vehicles

# Rexroth – your service partner for hydrostatic auxiliary drives

Bosch Rexroth hydraulic components are applied across a broad range of fans, compressors and generator drives in Diesel powered railway vehicles.

As railway equipment typically remains in operation in excess of 30 years, the vehicles receive regular inspection/maintenance and periodic overhaul. The result is that hydraulic components have to be rebuilt or replaced on a routine basis.

## This includes the following components:

- Axial piston pumps
- Axial piston motors
- Manifold assemblies
- Accessories (oil reservoir, sensors, electronics incl. software)

# Rexroth Service – the Original!

Your hydraulic components are in best/expert hands with us. Bosch Rexroth provides complete overhaul and repair service, all from the original manufacturer - It doesn't get better than this.

## Your benefits:

- **Published repair part pricing** protects against unpleasant surprises and allows costs to be budgeted well in advance.
- **Predetermined repair rates** enhances planning reliability and reduces capital commitment uncertainty for spare parts.
- **Only original spare parts** from Rexroth can guarantee the highest quality and reliability for the repaired components.
- **Completely overhauled components** are state-of-the-art and enjoy the same 12-month warranty as new product.
