ENGINEERING YOUR SUCCESS.

# Use PowerGrip® for Every Step of the Construction Process.

PowerGrip can be used as a trenching, grading or clamshell bucket with precise control and up to 120 degrees of jaw movement.

- **Constant operating speed.**
- **Holding force approximately 3x clamping force.**
- **Operating mechanism consists of a rotary actuator inside cross tube. No exposed cylinders.**

For more information on the PowerGrip, go to [www.helac.com](http://www.helac.com)
